

WEBSITE WHATSAPP WIDGET

Step-by-Step Connection Guide

Connect Your Storefront to the AI Support Bot

This guide outlines how to generate a custom WhatsApp Chat Button (Widget) and integrate it into your website storefront. This widget floats in the corner of your store, allowing visitors to start a WhatsApp chat with your AI Support Bot instantly.

Adding this widget can increase support engagement, reduce abandoned carts, and help customers resolve checkout queries immediately.

Prerequisites:

- Connected WhatsApp number in our AI Support Bot dashboard
- Admin access to your website builder (Shopify, WordPress, or HTML Editor)
- Basic familiarity with copy-pasting code scripts

Section 1: Customizing & Copying the Snippet

1. Open your AI WhatsApp Support Bot dashboard.
2. Navigate to the Settings -> WhatsApp Connection page in the sidebar.
3. Click on the 'Website Chat Widget' tab.
4. Customize the widget parameters: enter your WhatsApp Phone Number (include country code), choose Widget Style (Pill with text or Bubble icon only), and enter a Pre-filled Message.
5. Select the widget theme color, choose screen position (Bottom-Right or Bottom-Left), and toggle on the Pulse Attention animation.
6. Check the Live Preview on the right. Once satisfied, click the green 'Copy Snippet' button to copy the generated code to your clipboard.

Section 2: Installation on Shopify

1. Log in to your Shopify Admin Panel (admin.shopify.com).
2. In the left-hand sidebar, navigate to Online Store -> Themes.
3. Locate your active theme, click the three dots (...) icon next to the 'Customize' button, and select Edit Code.
4. Under the layout folder in the left sidebar, open the theme.liquid file.
5. Scroll down to the bottom of the theme.liquid file code to locate the closing `</body>` tag.
6. Paste your copied WhatsApp widget code snippet directly above the `</body>` tag.
7. Click Save in the top-right corner. Open your live storefront, and you will see the floating WhatsApp button!

Section 3: Installation on WordPress / WooCommerce

1. Log in to your WordPress Admin dashboard.
2. Navigate to Plugins -> Add New.
3. Search for 'WPCode' (formerly known as 'Insert Headers and Footers') and click Install Now, then Activate.
4. Once activated, click on Code Snippets -> Header & Footer in your WordPress sidebar menu.
5. Locate the Footer section text area box.
6. Paste your copied WhatsApp widget code snippet inside the Footer text area.
7. Click Save Changes at the top. The floating button will now appear on all pages of your WooCommerce storefront!

Section 4: Installation on General HTML Websites

1. Open your website source code directory.
2. Locate your main layout file, master template, or individual HTML files (e.g. index.html, footer.html).
3. Scroll to the very bottom of the file to find the closing `</body>` tag.
4. Paste your copied WhatsApp widget code snippet directly before the `</body>` tag.
5. Save your changes and upload/deploy the updated files to your hosting server.
